

# SOLID SLATTED ROLLER SHUTTER RANGE

Solid Slatted roller shutters are constructed from galvanised steel slats, offering high security and aesthetic appeal to shop fronts, factories, warehouses and commercial garages.

## Benefits

- These roller shutters are custom made to fit the aperture
- Offers high security and limited access
- These doors can be customised using different materials and component specifications according to the application
- Custom manufactured
- Durable and reliable
- Economical installation and maintenance
- Optimised utilisation of space
- Certain models feature aluminium T-Sections encompassing a rubber weather seal strip to resist weathering

# Material

Galvanised steel slats in 75mm x 0.6mm/0.8mm/1.0mm thick, depending on the opening
